

Course Description

Learning Design – Planning Effective Learning Experiences

This course has been developed by the Transforming Employability for Social Change in East Africa (TESCEA) partnership.

The purpose of the Learning Design – planning effective learning experiences online course is to introduce academic teaching staff to the aspects of Learning Design; a methodology which helps facilitators of learning to plan for the delivery of their courses step by step and from the perspective of learners. It helps to ensure varied and effective learning experiences for students.

This six-week online course can be taken as a standalone training, or subsequent to the other workshops that make up the [Transforming Higher Education for Social Change](#) redesign learning journey.

Hosted on Moodle, an online learning platform, the content of the Learning Design course is delivered in a mix-media – text-based resources, videos and interactive exercises. There is also group work with a dedicated discussion forum to share ideas and feedback on an authentic assignment as well as peer-review activity.

Following successful completion of all five units, academic teaching staff will develop a gender responsive, high-quality learning design for their own course, using the Learning Designer online tool.

Let's work together

Contact us via TransformHE@inasp.info if you are interested in our Learning Design online course and would like to discuss how we can work together to deliver this.
